

5. Issues

Hungary presents the possible problems of the HQYC project:

IT (error)
HUMAN (partner change)
COMUNICATION (internal and external) (roles non clear role) (SPAM) (Ignorance) (language: English native and non-native)
GROUPS
ORGANISATIONAL

FINANCIAL RISK (services) (pay less, pay more, cofinance)
TIME (project period is not sufficient for the project time) (timing) (could take a long time)
PARTNER DROP OUT
TECHNICAL (YouTube not allowed)
GDPR

6. Agreements for the GOOD PRACTICES collection

Each country presents the good practices and a debate is established.

- Some YC don't answer the templates questions.
- Problems with the pics: We need a .jpg or .png photo (3-5 for each good practice). In the other hand, the photos must be attached outside the Word.
- There're templates more develop than others: We need a common model.
- Name's translation: We agree to maintain the national name and a translation (in parentheses, but only if it's possible to translate. Not personal names).
- Hungary says that there's a huge difference between a village in HU or in LV, or a city in SP or in EE. The Manual introduction must have an explanation of the national realities.
- We need to create a map with all the good practices. We agree to use "Google Maps"
- English: Each country will have to correct the grammar of their own good practices.
- Each country can translate the Manual into its national language, but there isn't budget for this translation.
- Spain will be the responsible to edit and design the Manual, but Spain will not correct the grammar of the others countries.
- Manual (first edition): It will be ready the 1st of November
